USAGE NOTES

- All grids use the **MP** (Military Practice) 100,000m grid zone designation.
- Grids are 8-digit (10m accuracy) for training purposes.
- Cadre may substitute OPORD grids with actual LTA grids based on training objectives and terrain availability.
- When modifying OPORDs, ensure all grid references are updated consistently throughout the document.
- Consider terrain features and line-of-sight when selecting alternate grids.
